

# The CLAW™ Gutter Broom

## Tough Gutter Vegetation & Dense Dirt Stripped in One Pass

The CLAW™ has more stripping power, longer service life and lower total cost.

**The CLAW™ has More Stripping Power;** with 96 super swaged cable ends (at 0.25" diameter), 42% more cable contact area to the ground, and 33% more stripping cable weight than bolt-on attachment options.

Through extensive development & testing, ODB's patented CLAW™ gutter stripping broom, has demonstrated that it effectively strips vegetation, dense dirt, gravel, etc. with ease, at a lower cost, with less hassle to mount, and that lasts longer than any other option available.

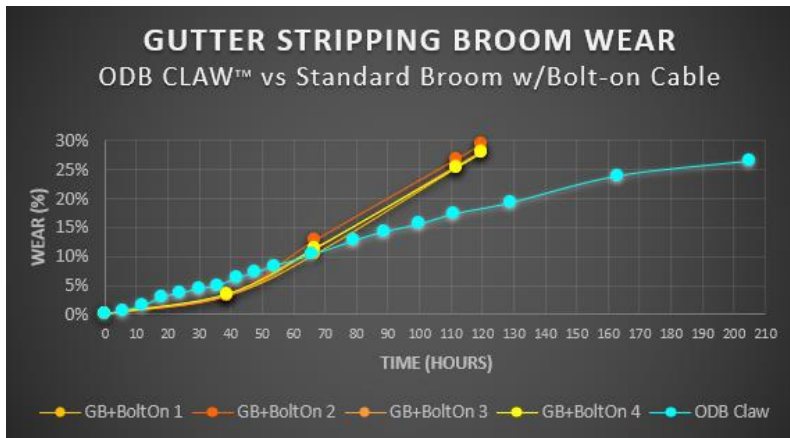

**PATENTED**

The CLAW™ is ideal for communities looking to reduce the use of chemicals in controlling unwanted vegetation growth.

The CLAW's™, heavy-duty stripping cable is integrated into standard sweeper blocks, and is compatible with all major sweeper brands and types. No separate bolt-on cable attachments need to be mounted or continuously adjusted. Simply install as you would any gutter broom.

**The CLAW™ is More Cost-effective;** costing about 30% less than gutter brooms with the bolt-on attachment options.

**The CLAW™ is More Robust;** side-by-side tests showed close to 2 times longer expected functional service life, and on-the-street comparison have validated the testing data.

**BEFORE**

**AFTER**

**The CLAW™ is Effective;** vegetation, dense mud and gravel cleared in one quick pass.
